

CALL FOR APPLICATIONS

MSc Fellowship Awards in Jordan

Due Date – 29 September 2019

MEDRC Water Research is pleased to announce the 2019 batch of the MEDRC MSc Fellowship Award in Jordan, administered in collaboration with the Water Authority of Jordan (WAJ), with funding provided by the Kingdom of the Netherlands, and Sida—Swedish International Development Cooperation Agency.

The MEDRC Water Research MSc Fellowship Award provides targeted funding to exceptional Master's students to help them pursue original research in critically important areas of water science and security. MEDRC Fellowship funds may cover tuition and fees, and research costs up to a total of \$5,000 USD. To date, MEDRC has supported over 250 water research projects across Jordan and Palestine, addressing national priorities of the water sector in Jordan.

Awarded MSc Fellows will be selected by a panel of experts representing MEDRC, WAJ, and participating Universities, with additional selected representatives, reflecting the national priority research interests of the Jordanian water sector, and international standards of excellence. Candidates will be rated on comprehensive criterion reflecting their academic ability, innovative ideas, the strength of the research proposal, and the strategic impact of their work on local water challenges.

MSc selection criteria will be based on a scored system assessing the following:

- Strength of research proposal and applicability to regional water issues
- Academic profile—course transcripts, thesis, and publications
- Professional work experience
- Statement of purpose
- Letter of recommendation
- Interview assessment (*if applicable*)

Funding provided by:

Government of the Netherlands

In coordination with:

Hashemite Kingdom of Jordan

1.1 ELIGIBILITY

Must be a resident national of Jordan

Applicants are expected to have:

- an unconditional offer for, or be enrolled in, full-time MSc coursework at a qualifying university;
- completed an undergraduate degree in a related subject (relevant work experience in a related sector is also valuable);
- fluency in English—able to complete the original Master's thesis in English;
- a clear thesis proposal including comprehensive budget, addressing an immediate need or specific problem as identified by the water authorities in Jordan, related to: desalination, hydrology of arid areas, climate change, water treatment/water quality monitoring, water reuse or water resource management; and
